Limassol, Cyprus

A Global Portfolio Investment Company is seeking to build their team

**Financial Systems Engineer**

To join the team developing and managing the firm’s complex & high frequency trading system within a project management environment and close communication with execution system specialists and brokers. He/she will also be involved in maintaining and operating the in-house electronic analysis and trading systems. The ideal candidate will have excellent all round analytical and computing skills, mathematical ability, able to meet deadlines coupled with, preferably, an exposure to the finance industry. The individual will need to be able to understand complex trading processes and systems and help the on-going development of control parameters, to ensure reliability, consistency, process quality and control.

**Requirements:**

- A graduate Degree in chemical or electrical engineering, science, computing, or other numerate field numerate or engineering field.
- A post-graduate Degree PhD level.
- Strong working and proven knowledge of .NET C# and SQL
- Proactive approach to implementing enhancements, process improvements, whilst maintaining precision.
- Experience within a high frequency trade support environment.
- Ability to understand, monitor and develop complex workflows within a widely distributed real-time system.
- Fluency in English is a must.

**Business Systems Analyst**

To join the existing Business Systems Development team and be involved with the ongoing development of integrated systems including operations, legal, marketing and database management, and including the ongoing development of a global set of related websites. The team is also responsible for designing, maintaining and managing various reporting mechanisms globally. It further involves the development and support of the company’s marketing systems, third-party information systems and other business related applications. We are seeking a professional with a critical approach to his/her work, experience in a varied, fast-moving project environment, knowledge of databases, a desire to build flawless systems, and with background in the development and design of large, complex software systems. We are seeking an individual who has a meticulous eye for detail together with the ability to see the bigger picture, and be a team player.

**Requirements:**

- A good honours degree in computing or numerate fields.
- At least 2 years development experience and 1 year experience in the financial industry
- Minimum 2 years work experience using MS Visual Studio 2000/2005 ASP .NET, C#
- Minimum 2 years work experience using MS SQL Server 2005/2008
- Minimum 2 years work experience in graphics design (PhotoShop, PaintShoPro, Illustrator)
- Experience in developing Web applications (.NET, HTML, Java/VB Script, IIS)
- Ability to work under pressure and meet tight deadlines
- Excellent communications & interpersonal skills. Fluency in English is a must.

We offer a stimulating environment with exciting personal growth and long-term career opportunities, as well as a competitive salary and relocation package. Please submit your CV and cover letter in English to recruitment2@nemesos.com by Friday 23 December 2011.
